

Who we are

ENGIRO GmbH is a dynamically growing, family-run, medium-sized company with flat, interdisciplinary structures. We develop and produce electric drives for mobile machinery, boats and special and commercial vehicles. Together with our international partner network, we actively solve the challenges of sustainable mobility for our customers. Our focus is on the design, construction and parameterization of electric motors and drives as well as the support of our customers during commissioning.

We offer

- ⊕ a detailed initial training period in our highly motivated, committed and awesome team
- ⊕ the opportunity to determine your own work processes, to take responsibility and to realize ideas
- ⊕ the chance to actively contribute to the development of a fast-growing technology company
- ⊕ flexible working hours and hybrid work set up, as well as the compatibility of family and career
- ⊕ appropriate and performance-oriented payment
- ⊕ corporate pension plan
- ⊕ corporate benefits program
- ⊕ assumption of municipal childcare costs
- ⊕ free cold and hot drinks, as well as numerous employee parking spaces in front of the office

For our team we are looking as soon as possible for a

Electrical machinist - Electronics technician (m/f/d) for machines and drive technology

We are looking forward to a new team player in full-time (40h) with:

- ⊕ a completed apprenticeship and effective written and verbal communication skills in German.
- ⊕ a positive attitude and pleasure in real teamwork.
- ⊕ together with the team you will prepare the test benches, conduct quality controls and maintenance in the factory and support our production.
